(a) aluminium, not NaOH,
sets the feedstock floor
aluminium + fresh NaOH
aluminium only
Kaur & Verma top-down ($21)
steam methane reforming ($2.90)
feedstock cost (US$ per kg H2)
external scrap fraction ϕ (--)

(b) NaOH recovery is worth at most
US$2.9 per kg H2
aluminium-only floor
recovered NaOH at $363 t-1
recovered NaOH free
SMR benchmark
cost at ϕ = 0.74 (US$ per kg H2)
NaOH recovery fraction (--)
